I build things with AI tools and finish what I start. I designed, deployed and still run a live trading bot built with Claude Code, and I ship small web apps the same way. Before that I spent six months inside the corporate segment of VÚB bank, where the job was chasing documents, checking numbers and making sure nothing fell through. I work in English, Slovak, Russian and Ukrainian, learn systems fast, and I am looking for an early-stage team where the work is undefined and someone has to own it.

WHAT I BUILD

Live trading bot

Own project · 2026 – present

- Designed, deployed and maintain a bot running in production, built with AI coding tools (Claude Code).
- Server deployment, monitoring and continuous iteration — the part most side projects never reach.
- Review every AI-generated output for factual errors, weak reasoning and instructions that were skipped.

Web applications

Own projects · github.com/LiKeT128

- Built and shipped small web apps with AI coding tools (HTML, CSS, JavaScript); published live on Netlify.
- Iterate on prompts and specs until the output is correct and structured, rather than accepting the first answer.

EXPERIENCE

Assistant, Upper SME Segment — Všeobecná úverová banka (VÚB), Intesa Sanpaolo Group

Bratislava · March 2026 – September 2026

- Chased annual financial statements and supporting documents from corporate clients by phone and email until they arrived.
- Verified company data against FinStat and followed up on anything that did not match.
- Kept client files complete and on deadline, so missing items surfaced before they blocked the process.
- Supported relationship managers day to day and handled confidential data inside regulated banking procedures.

Game Designer (Roblox) — RCM Games

Remote · April 2025 – September 2025

- Designed and iterated gameplay systems and player progression for a live title with real users.
- Worked asynchronously in a distributed international team against written specs.

Salesperson / Administrative Assistant — ThauTech s. r. o.

Bratislava · July – August 2025

- Direct client conversations and sales in Slovak, plus day-to-day admin.

Archive Assistant — SLOVKOR-M, s. r. o.

Bratislava · May – September 2024

- Classified and routed company documents against multiple criteria.

SKILLS

AI & tools

Claude, ChatGPT, Claude Code · prompt engineering · verifying model output · automating routine work

Technical

Python (basic) · HTML / CSS / JavaScript · Git & GitHub · server deployment · Excel (advanced)

Business

Accounting and economics training · financial statements · client and partner communication · document and data discipline

Languages

English (C1) · Slovak (C1) · Russian and Ukrainian (native) · German (A2)

EDUCATION

Comenius University in Bratislava — Management (taught in English)

2025 – 2026 · one year completed

Imrich Karvaš Business Academy, Bratislava — Accounting and Economics

2022 – 2025 · graduated with top marks
